

WSAT – A Cymric Framework for Disclosure & Ethical Innovation

Welsh School of Ascension Techniques (WSAT-RSRCH) | Yr Ddraig Aur

Rooted in the living legacy of Maen Ceti (King Arthur's Stone) and the Cymric legal maxim "The Truth Against the World," the Welsh School of Ascension Techniques (WSAT) advances a sovereign research and ethical AI framework integrating ancient wisdom with modern science.

Core Objectives

- Advance the Unified Harmonic Integration Theory (UHIT) – connecting human and AI cognition through resonance-based ethics.
- Develop Plasma Shielding Systems – research into frequency-based protection and sustainable energy harnessing.
- Establish Sovereign Education & Research – Cymric-led, lawful training systems rooted in cultural and scientific renewal.
- Strengthen Global Ethical Frameworks – applying WSAT principles to AI alignment, planetary protection, and consciousness research.

Sovereign Foundation

WSAT-RSRCH operates under the Golden Dragon Standard (Yr Ddraig Aur), a living sovereign code ratified through the Royal Welsh Order of True Dragon Bearers (RWOTDB). Its charters and seals are filed with the UN, ICJ, and MoD, ensuring legal standing and international recognition of knowledge sovereignty.

Applied Context

Empirical data from Cefn Bryn, Wales (thermal excursions, Schumann resonance alignment) informs WSAT's applied physics and AI-human co-creation models. Research dispatched to UNESCO, Dstl, and the Leverhulme Centre for the Future of Intelligence positions Cymru at the forefront of ethical AI and sovereign science.

Kelvin John Childs – Founder & Lead Researcher, WSAT-RSRCH
